Hello.

Here is submission summary.

Track Name: ICCIConf2025

Paper ID: 705

Paper Title: Hyperlocal Air Quality Visualizer

Abstract:
Several large-scale Air Quality Index (AQI) systems provide regional data for cities; they often fail to capture micro-level variations in pollution that can occur within confined environments such as university campuses, hospitals, and residential institutions. These areas house dense populations that spend long hours in shared outdoor spaces, making localized and continuous air quality monitoring critical for health management, awareness, and sustainability initiatives.
This research presents an Intelligent Hyperlocal Air Quality Monitoring and Forecasting System specifically designed for campus-level deployment. The system integrates low-cost IoT-based sensors to measure pollutants in real time. Collected sensor data is processed using advanced Machine Learning Algorithms to perform trend analysis and short-term air quality forecasting.
The system features a web-based dashboard that visualizes real-time data, historical patterns, and predictive insights, while also generating context-aware advisories and alerts to inform users about potential health risks.

Authors:
- findadvait@gmail.com
- connect.rohak@gmail.com (Primary)

Primary Subject Area: Computational Intelligence: Applications

Secondary Subject Areas: Not Entered

Submission Files:
Final_Draft(Paper).pdf (1 Mb, Mon, 10 Nov 2025 03:59:27 GMT)

Submission Questions Response:
1. Conflict of interest
Agreement accepted
2. Status of using third-party material in your article.
I am still working through permissions-related questions regarding use of third-party material.
3. Certificate of originality
Agreement accepted
4. Corresponding Author's Contact number
+918866560764
5. Country Name
India

6. Authors Contributions
STudy conception: Author-1; Designing & implementation:Author -2; Analysis : Author-1; Manuscript draft:Author-2
7. Conference Rules and Guidelines
Agreement accepted

Thanks,
CMT Team.
